

Bilbao, 1/VII/2012

**Congratulations to the awarded of the:**

**HPC-EUROPA2 FELLOWSHIP**  
**Bruno ESCRIBANO (BCAM, Bilbao, Basque Country)**

Dr. Bruno [ESCRIBANO](#) - - Postdoctoral Fellow of Mathematical Biology and Molecular Simulation (MBMS) line research at BCAM has been awarded an HPC-EUROPA2 fellowship funded by the European Union. The fellowship provides funds for the Project: "Coarse-grained hybrid Monte Carlo simulations of polyelectrolyte multilayers", in collaboration with the Institute for Computational Physics (ICP) at Stuttgart University. The project was initiated in the MBMS group and will be focused on applications of the new methods developed in the group.

HPC-EUROPA2 <http://www.hpc-europa.eu> is a Pan-European Research Infrastructure on High Performance Computing. HPC-EUROPA2 is an EC-funded Transnational Access programme which offers European-based scientists an opportunity to travel to another country to work in collaboration with researchers in a similar field, while having access to most powerful computers in Europe. The project is funded by the European Commission - DG Research in the Seventh Framework Programme.
