## Bruno ESCRIBANO has obtained a grant from the Iberdrola Foundation

- *The grant is part of the program "Energy for Research" aimed at young researchers for their training and development in the area of sustainability.*

Bruno ESCRIBANO, BCAM Researcher at Research Line **Modelling and Simulation in Life and Material Sciences** has obtained a "Grant for Energy and Environment Research" from the Iberdrola Foundation to promote research in subjects aimed at developing a sustainable energy model. The project, "TOWARDS AN ATOMISTIC UNDERSTANDING OF SODIUM-ION BATTERIES ON THE NANOSCALE", led by **Elena AKHMATSKAYA** in collaboration with **Javier CARRASCO** (CIC Energigune), will focus on the development of new computational methods applied to the characterization of materials used in rechargeable batteries.
