

BCAM VISITING FELLOW PROGRAM - HOW TO APPLY

Every year BCAM offers research opportunities for outstanding researchers in Mathematics and related areas from all over the world (at both early stage and experienced levels) for short and long-term visits, through the Visiting Fellow programme.

Researchers in any branch of applied mathematics and related areas are invited to apply if they would like to spend a period of at least 4 weeks, and up to 6 months at BCAM. BCAM provides a stimulating environment to foster research activities in collaboration with BCAM researchers and networking with other research centers in the Basque Country.

Profile of the candidate:

Successful candidates are expected to be outstanding researchers in two categories: young or experienced researchers of substantial international experience. We welcome applications from Visiting Fellows with joint research interests with members of our Research Lines <http://www.bcamath.org/en/research/lines> as well as researchers with complementary expertise. Applications from women are strongly encouraged.

NOTE: Before submitting your visiting fellow proposal you must contact the coordinator of the research area that best matches your scientific interests. The contacts are the following:

Analysis of Partial Differential Equations (APDE): Prof Luis Vega (lvega@bcamath.org)

Computational Mathematics (CM): Prof Marco Ellero (mellero@bcamath.org)

Data Science (DS): Prof J.A. Lozano (jalozano@bcamath.org)

Mathematical Modelling with Multidisciplinary Applications (M3A): Prof Elena Akhmatskaya (eakhmatskaya@bcamath.org)

Mathematical Physics (MP): Prof Javier Fdez de Bobadilla (jbobadilla@bcamath.org)

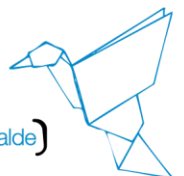

Duration:

The duration of the Visiting Fellowship is normally between 1 and 6 months. The Visiting Fellows Program involves a contract between BCAM and the researcher or an agreement with the researcher's institution. The salary corresponding to this contract is intended to cover the costs of accommodation, local travel, travels, food and/or honorarium.

How to apply:

You may submit the form via email visitingfellow@bcamath.org with the following documents:

- Attached form filled, including the Research Statement that should explain the research project you intend to pursue, expected results and the researchers with whom you will collaborate (max 1 page)

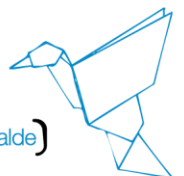

- Short CV (max 2 pages)

Application deadline:

Applications will be evaluated in a continuous manner, with a response period of about 4-6 weeks.

Selection criteria:

- CV of the applicant
- Potential for interaction with BCAM research areas
